Woodburners & Insert Stoves

The spiralling costs of domestic fuel bills, and the relentless continuing rise in oil, gas and electricity prices, coupled with the imposition of a carbon tax on all fossil fuels, makes wood the fuel of the future.

Wood is a renewable, carbon neutral fuel which is readily available to many people at a reasonable, or sometimes zero cost option for heating our homes.

An efficient wood burning built in fire can make a valuable contribution to reducing overall heating costs in the home, as well as being a beautiful and welcoming addition to your room.

Everybody loves the look and feel of an open fire, but most ordinary open fires burning coal, wood, or smokeless fuel are not working to their full potential and are very inefficient. A standard open fire is approximately 14% efficient. By installing an enclosed log-burning appliance you will increase the efficiency of your fire to approximately 80%. Installing a Kal-Fire, a Bodart & Gonay or Wanders built in fire can be a straight forward procedure and can help you get more out of your precious fuel.

From our 3 main ranges
**KAL-Fire, Bodart & Gonay and
the Wanders fire collection**
we have an extensive product
portfolio with refined features
such as

- Automatic Thermostats
- Elevating Doors
- Outside Air Intake
- Silent Fans
- Thermo Switch

Bio Ethanol Fires

Our Bio-Blaze range of Bio Ethanol fires offers you a collection of innovative fireplaces. These fireplaces function on bio ethanol fuel which is a by product of sugar cane.

They do not require any installation, nor do they release any smoke, or fumes into the atmosphere. They have a realistic flame, good output and low running costs making the design of the Bio Blaze fireplaces a great choice for your interior and exterior decoration.

Granite Worktops

In today's ever changing interiors, there is now more emphasis and demand for high quality products and natural materials. This has never been more prevalent than in the kitchen, the heart of the home, resulting in more time and effort being spent as to how they look, function and feel.

For these reasons granite worktops in the home are now more popular than ever, they are the ultimate statement in kitchen design. They add style and sophistication to any kitchen and there are also the functional benefits.

Our service speaks for itself, when you purchase a worktop from Lamartine Ltd, you can expect the following:

1. Free Quotation Service
2. Consultation Service
3. Templating Service
4. Viewing Service
5. Fitting Service.

Additional Services

Along with our wide range of products we offer a professional selection of services to include:

- Chimney Cleaning
- Chimney Camera Inspections
- Gas installation by RGI approved engineer
- Full Stove & Woodburner installation with HETAS approved installers
- Fireplace repairs & restorations
- Made to measure fireplace designs
- Full selection of mirrors to compliment our full fireplace range
- Full range of fireside accessories to include Companion sets, Fenders, Fire grates.
